

SIOBHAN McAULEY

Senior Product Manager | EdTech & AI-Native Products | Activation · Onboarding · Integrations

Boston, MA | (617) 233-7426 | sio.boston@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Product Manager with 14 years building Macmillan's Achieve platform, designing onboarding, IAM architecture, and analytics for 1.5M+ learners across higher education and K–12. Hands-on AI product experience via The Hearth, a live iOS app shipped independently using the Anthropic API. Specialized in multi-persona user journeys that close the gap between signup and engagement, driving activation and retention at scale.

CORE COMPETENCIES

EdTech · User Onboarding · Activation & Retention · LMS & SSO Integrations · IAM Architecture · FERPA / COPPA · A/B Testing · Agile / Scrum · AI-Native Product Development · Amplitude Analytics

PROFESSIONAL EXPERIENCE

Founder & Product Lead · The Hearth (Independent) · 2025 – Present

Built and shipped a live iOS app independently, from concept through App Store launch, using React Native, Expo, Supabase, and the Anthropic API.

- Designed and implemented a freemium subscription model (Wanderer/Practitioner tiers) using RevenueCat, including custom backend logic to protect comped user access across RevenueCat sync cycles.
- Integrated an AI conversational companion via the Anthropic API, owning prompt architecture, context management, and post-launch iteration as sole PM, designer, and product owner throughout.

Product Manager, Achieve Platform · Macmillan Learning. October 2012 – November 2025

Product Manager for Achieve, Macmillan's flagship digital learning platform serving 1.5M+ users across higher education and K–12, driving 19% YoY revenue growth through onboarding, access management, IAM architecture, and market expansion.

- Increased learner activation 9% YoY by redesigning multi-persona onboarding flows to reduce first-session friction across higher education and K–12 segments.
- Expanded Achieve into the high school market by building district-level seat management workflows, dynamically lowering paywalls for institution-funded access and enforcing seat limits against purchase orders, and designing a bifurcated IAM architecture (HS and HE under a parent entity in Salesforce) that enabled COPPA-compliant marketing containment and correct data segregation for minor users, making district contract pursuit viable for the first time.
- Launched data-driven analytics dashboards for instructors and administrators by identifying critical evidence gaps in classroom decision-making, resulting in adoption across hundreds of school districts and strengthening Achieve's position as the analytics-forward platform in K–12.

Senior New Media Editor · Macmillan Learning. October 2011 – October 2012

Developed digital learning content and instructor-facing experiences for higher education, the product immersion that shaped my understanding of ed-user behavior and drove my transition into product management.

EDUCATION & CERTIFICATION

Bachelor of Arts, Psychology · Dublin City University, Dublin

Product Management Certificate · General Assembly
